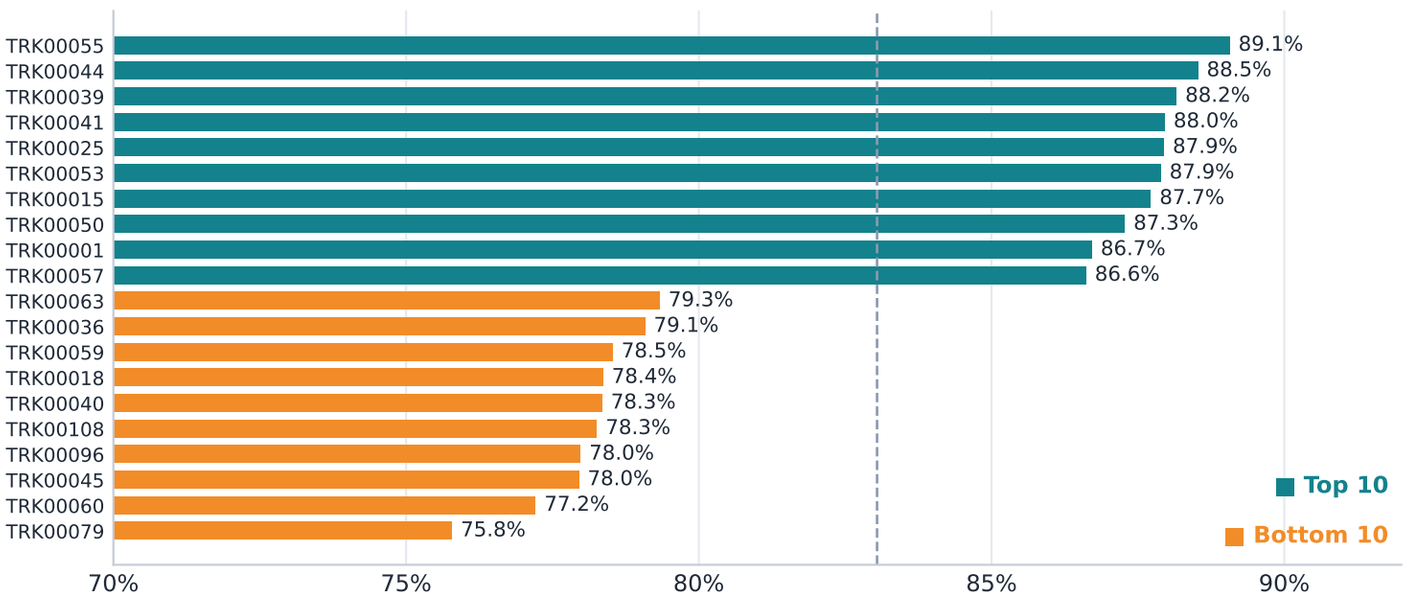
Top 10 vs Bottom 10 Trucks by Utilization



Key Insights

- Fleet utilization averaged 83.0%
- 2022: 83.45% | 2023: 82.32%
  2024: 83.36%
  A small dip in 2023, recovered in 2024
- Highest: TRK00055 at 89.1%
  Lowest: TRK00079 at 75.8%
- Why do some trucks sit below the fleet average? Worth investigating.

Executive summary: Overall fleet utilization stayed strong, but performance varies a lot between individual trucks. The gap between the best and weakest assets points to an opportunity to improve dispatch allocation and cut inactive capacity.
